## Assemblin conducts extensive multi-project for AstraZeneca

**Assemblin has been assigned responsibility for multi-technical installations in plumbing, industrial pipes, fire alarms, electricity, ventilation, cooling and control in a new project for AstraZeneca in Södertälje, Sweden. Assemblin is also general contractor for the construction, groundwork and metalworking aspects of the project.**

The project is being conducted in partnership with Caverion and Stockholm Design & Construction, both part of the Assemblin Caverion Group, as well as with external subcontractors. The assignment involves upgrading and securing cooling capacity at the Gärtuna production plant by replacing cooling units, installing cooling towers and extending the existing central cooling facility. The assignment also includes installation of supplementary equipment and custom-built components, as well as coordinating the installation work.

“With yet another complex assignment for AstraZeneca, we are demonstrating Assemblin’s strength as a multi-technical partner for large-scale industrial projects, and we are very pleased with the continued trust shown in us,” says Andreas Aristiadis, EVP and President for Assemblin Heating and Sanitation.

“Having conducted earlier projects in Gärtuna, we enjoy a highly favourable partnership and are now continuing to upgrade and future-proof the plant in accordance with current climate requirements and the anticipated need for additional cooling capacity. As general contractor, we will meet the challenge of safeguarding the supply of cooling during the project to avoid disruptions to pharmaceutical production,” says Robin Wahlström, Project Manager at Assemblin.

The project commenced in 2025 and is scheduled for completion in the autumn of 2026.

### **About Assemblin**

Assemblin is an end-to-end installation and service partner with operations in Sweden and Norway. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration in some 100 locations and are supported by a strong organisation. Read more at [assemblin.se](https://assemblin.se).

### **About Assemblin Caverion Group**

Assemblin Caverion Group is a leading technical service and installation provider in northern Europe. The Group comprises some 21,000 skilled employees in nine countries who share a passion for intelligent and sustainable solutions. We conduct installation services and provide technical services and solutions throughout the life cycle of the built environment, supporting customers whose demands in terms of energy-efficiency, sustainability and automation for buildings, infrastructure and industrial facilities are increasing. Assemblin Caverion Group was formed in April 2024 through the merger of Assemblin and Caverion. Our total annual sales amount to about SEK 42 billion/EUR 3.7 billion.
